Discovering New Foundations for the Great Work of Our Time

By Carl Anthony
Foreword by M. Paloma Pavel

“By 2042 the majority of people in the United States will be people of color. Can we reduce greenhouse gas emissions, build a robust economy strong enough to reduce income inequality, where everyone lives in a healthy and safe environment. This is the challenge for the next generation of environmental justice leaders.”

Growing the next generation of climate justice leaders.
“The steps we take now
Make new earth grow
beneath our feet.

The steps we take now
decide what kind of
earth that will be”
